

Dektite® MULTICABLE SOLAR FLASHING

The speciality flashing for solar PV cables on tile or slate roofs

- Allows up to 10 PV cables to be taken safely and tidily through any tile or slate roof
- Avoids risk of damage or pressure on cables by isolating from tiles or slates
- **Dektite®** quality EPDM boot provides completely weatherproof seal
- Acrylic protected lead apron – safe to handle, no staining, easily dressed to roof
- 20 year warranty

fast - effective - safe
